

Testing the "My orders" tab of the Sinsay online store:  
<https://www.sinsay.com/pl/pl/sales/order/history/>

The screenshot shows the 'Historia zamówień' (Order History) page of the Sinsay online store. The page header includes the Sinsay logo, a search bar, and navigation links for various categories. The main content area displays a table of orders. The table has columns for LP (Order ID), Numer (Order Number), Data (Order Date), Wartość (Order Value), and Status (Order Status). The dates are not aligned to the right, indicating a defect.

## DEFECTS

Title: The offset to the display of the order date in the order list table in the customer's account.

Severity: Cosmetic

Środowisko: Environment: Google Chrome browser version 97.0.4692.71, W10 operating system

Steps for reproduction:

Prerequisite	Browser opened on the website: <a href="https://www.sinsay.com/pl/pl/sales/order/history/">https://www.sinsay.com/pl/pl/sales/order/history/</a> ; user logged in to his customer account
Step 1	Open the "My orders" tab
Step 2	Scroll down to the order list area
Step 3	Visually verify the arrangement of the visible table

Expected result: The date the order was placed, which number is less than 10 characters, is aligned with the other dates in the column.

Current Result: The column with the date the order was placed moves according to the length of the order number in the column on the left. If the order number is shorter than 10 characters, the date field moves slightly to the left.
